to a network system or off a network server. This feature reduces the initial costs associated with switching to a new data management system. It also allows the county to use existing hardware infrastructure if desired.

Because the latest programming methodology and technology was used to design the system, it can be maintained more easily. Remote support services are available for timely solutions. Our service agreement includes support and upgrades.

Our team of developers is continuing to improve **Quartz**. We are also continuing to expand the line of solutions to provide the county with a suite of products. iDocket.com is committed to providing quality solutions for Clerks to increase productivity and functionality. Our applications tie together to provide the most comprehensive, easy to use solution possible.

iDocket.com's **Quartz** Case Management System is designed to be easy to use and maintain. By using the latest in technology and software methodology, iDocket.com's data management solutions are built to last.
